Number One

Strategies for information requirements determination 4
G. B. Davis

Business Systems Planning and Business Information Control Study: A comparison 31
J. A. Zachman

Supporting Business Systems Planning studies with the DB/DC Data Dictionary 54
J. G. Sakamoto and F. W. Ball

Towards an integrated development environment 81
P. S. Newman

Enterprise information analysis: Cost-benefit analysis and the data-managed system 108
M. M. Parker

Number Two

Management considerations for an Information Center 131
L. W. Hammond

How data flow can improve application development productivity 162
W. P. Stevens

SNA flow control: Architecture and implementation 179
F. D. George and G. E. Young

Technique for assessing external design of software 211
R. J. Pearsall

The Document Interchange Architecture: A member of a family of architectures in the SNA environment 220
T. Schick and R. F. Brockish

Number Three

JANUS: An interactive document formatter based on declarative tags 250
D. D. Chamberlin, O. P. Bertrand, M. J. Goodfellow, J. C. King, D. R. Slutz, S. J. P. Todd, and B. W. Wade

Office-by-Example: A business language that unifies data and word processing and electronic mail 272
M. M. Zloof

The EPISTLE text-critiquing system 305
G. E. Heidorn, K. Jensen, L. A. Miller, R. J. Byrd, and M. S. Chodorow

OPAS: An office procedure automation system 327
V. Y. Lum, D. M. Choy, and N. C. Shu

A case study of office workstation use 351
C. V. Bullen, J. L. Bennett, and E. D. Carlson

Number Four

The design rationale of the System/38 user interface 384
J. H. Botterill

How a computer should talk to people 424
M. Dean

Analytic queuing model for CICS capacity planning 454
M. Deitch

Modeling distributed processing across multiple CICS/VS sites 471
R. D. Acker and P. H. Seaman

IMS/VS: An evolving system 490
J. P. Strickland, P. P. Uhrowczik, and V. L. Watts

Volume 21
1982

Reprints

Beginning with Volume 14, reprints of all articles appearing in the *IBM Systems Journal* are available from IBM at $1.00 each. Also available are the Cumulative Index for 1975–1981 that includes abstracts, at $2.00 per copy, and the collection of papers on SDLC, at $1.75 per copy. All reprints should be ordered by form number from the local IBM branch office. The order form number of each article is printed on the last page of the article, following the references or appendix. Any article preceding Volume 14, although not available from IBM, may be obtained from University Microfilms, 300 N. Zeeb Road, Ann Arbor, Michigan 48106, for a nominal fee. The following list of reprints that are currently available from IBM includes the form numbers:

Special Reprints

Cumulative Index, 1975–1981 *G321-5143*

Synchronous data link control/Store Systems *G321-5018*

Individual Article Reprints

Overview of the Supermarket System and the Retail Store System
P. V. McEnroe, H. T. Huth, E. A. Moore, and W. W. Morris III *G321-5001*

The characteristics and decodability of the Universal Product Code
D. Savir and G. J. Laurer *G321-5002*

The role of the operator in the Supermarket and Retail Store Systems
D. C. Antonelli *G321-5003*

Store performance studies for the Supermarket System
W. C. Metz, Jr. and D. Savir *G321-5004*

Design and performance considerations for the Retail Store System
M. A. Berk, C. W. Dunbar, and G. C. Hobson *G321-5005*

Reliability, availability, and serviceability design considerations for the Supermarket and Retail Store Systems
R. O. Hippert, L. R. Palounek, J. Provetero, and R. O. Skatrud *G321-5006*

A program generator
W. D. Hagamen, D. J. Linden, K. F. Mai, S. M. Newell, and J. C. Weber *G321-5007*

Performance measurement tools for VM/370
P. H. Callaway *G321-5008*

Elements of queuing theory for system design
A. O. Allen *G321-5009*

Hierarchical approach to computer system integrity
J. J. Donovan and S. E. Madnick *G321-5010*

An access control mechanism for computing resources
H. M. Gladney, E. L. Worley, and J. J. Myers *G321-5011*

Generalized audit trail requirements and concepts for data base applications
L. A. Bjork, Jr. *G321-5012*

Tuning a virtual storage system
H. A. Anderson, Jr., M. Reiser, and G. L. Galati *G321-5013*

The Power Profile—An installation management tool
J. A. Laird *G321-5014*

Computer center optimization by a pricing-priority policy
S. B. Ghanem *G321-5015*

Productivity of computer-dependent workers
D. N. Streeter *G321-5016*

Computer installation accounting
H. M. Gladney, D. L. Johnson, and R. L. Stone *G321-5019*

Evaluating system changes under uncontrolled workloads: a case study
H. P. Friedman and G. Waldbaum *G321-5020*

Testing in a complex systems environment
M. O. Duke *G321-5021*

Performance analysis of virtual memory time-sharing systems
Y. Bard *G321-5022*

Structured programming for virtual storage systems
J. G. Rogers *G321-5023*

Systems Network Architecture: An overview
J. H. McFadyen *G321-5024*

The role of the Network Control Program in Systems Network Architecture
W. S. Hobgood *G321-5025*

The transmission subsystem in Systems Network Architecture
P. G. Cullum *G321-5026*

The Virtual Telecommunications Access Method: A Systems Network Architecture perspective
H. R. Albrecht and K. D. Ryder *G321-5027*

LABS/7—a distributed real-time operating system
D. L. Raimondi, H. M. Gladney, G. Hochweller, R. W. Martin, and L. L. Spencer *G321-5028*

Penetrating an operating system: a study of VM/370 integrity
C. R. Attanasio, P. W. Markstein, and R. J. Phillips *G321-5029*

Experiments in line quality monitoring
P. Bryant, R. W. Giesin, Jr., and R. M. Hayes *G321-5030*

HIPO and integrated program design
J. F. Stay *G321-5031*

Top-down development using a program design language
P. Van Leer *G321-5032*

Design and code inspections to reduce errors in program development
M. E. Fagan *G321-5033*

Composite design facilities of six programming languages
G. J. Myers *G321-5034*

A model of large program development
L. A. Belady and M. M. Lehman *G321-5035*

Data base systems (Readings) *G321-5036*
On virtual machine integrity (Forum) *G321-5037*

The Peterlee Relational Test Vehicle—a system overview
S. J. P. Todd *G321-5038*

Interactive modeling of computer systems
M. Reiser *G321-5039*

Service levels: A concept for the user and the computer center
L. J. Lewis *G321-5040*

An APL emulator on System/370
A. Hassitt and L. E. Lyon *G321-5041*

A user-oriented data-base retrieval system
A. U. Jones *G321-5042*

An APL interpreter and system for a small computer
M. Alfonseca, M. L. Tavera, and R. Casajuana *G321-5043*

The IBM 5100 and the Research Device Coupler—A personal laboratory automation system
H. Cole and A. A. Guido *G321-5044*

A method of programming measurement and estimation
C. E. Walston and C. P. Felix *G321-5045*

The information management system IMS/VS Part I: General structure and operation
W. C. McGee *G321-5046*

The information management system IMS/VS Part II: Data base facilities
W. C. McGee *G321-5047*

The information management system IMS/VS Part III: Batch processing facilities
W. C. McGee *G321-5048*

The information management system IMS/VS Part IV: Data communication facilities
W. C. McGee *G321-5049*

The information management system IMS/VS Part V: Transaction processing facilities
W. C. McGee *G321-5050*

A high-performance DB/DC system
J. E. Siwiec *G321-5051*

On compilability and composite design (Forum) *G321-5052*

Data structures and data accessing in data base systems past, present, future
M. E. Senko *G321-5053*

CICS/VS and its role in Systems Network Architecture
D. J. Eade, P. Homan, and J. H. Jones *G321-5054*

Automated logical data base design: Concepts and applications
N. Raver and G. U. Hubbard *G321-5055*

Query-by-Example: a data base language
M. M. Zloof *G321-5056*

Design techniques for a user controlled DB/DC system
G. F. Heyne and C. J. Daniel *G321-5057*

Storage and access in relational data bases
M. W. Blasgen and K. P. Eswaran *G321-5058*

MARC: MVS archival storage and recovery program
J. P. Considine and J. J. Myers *G321-5059*

An input-output econometric model
K. S. Sarma *G321-5060*

IBM's Santa Teresa Laboratory—Architectural design for program development
G. M. McCue *G321-5061*

A method for the time analysis of programs
S. L. de Freitas and P. J. Lavelle *G321-5062*

Measuring programming quality and productivity
T. C. Jones *G321-5063*

The Extended Control Language of MPSX/370 and possible applications
L. Slate and K. Spielberg *G321-5064*

Solving the installation scheduling problem using mixed integer linear programming
R. Chen, H. Crowder, and E. L. Johnson *G321-5065*

A cryptographic key management scheme for implementing the Data Encryption Standard
W. F. Ehrsam, S. M. Matyas, C. H. Meyer, and W. L. Tuchman *G321-5066*

Generation, distribution, and installation of cryptographic keys
S. M. Matyas and C. H. Meyer *G321-5067*

Cryptography architecture for information study
R. E. Lennon *G321-5068*

Administrative control of computing service
H. M. Gladney *G321-5069*

Data processing spheres of control
C. T. Davies, Jr. *G321-5070*

Job networking
R. P. Crabtree *G321-5071*

Network job entry facility for JES2
R. O. Simpson and G. H. Phillips *G321-5072*

Experiments in computer-aided graphic expression
J. F. Musgrave *G321-5073*

A time-sharing display terminal session manager
J. M. McCrossin, R. P. O'Hara, and L. R. Koster *G321-5074*

Enhanced problem determination capability for teleprocessing
J. B. Ford *G321-5075*

Performance tuning in OS/VS2 MVS
T. Beretvas *G321-5077*

Distributed data processing
A. L. Scherr *G321-5078*

National Westminster Bank mass storage archiving
C. M. Gravina *G321-5079*

The development of software systems to aid in physical planning
B. S. Smedley *G321-5080*

Data Stream Linkage Mechanism
J. P. Morrison *G321-5081*

Performance investigations with a DOS/VS-based operating system model
W. Kraemer *G321-5082*

A performance model of MVS
W. W. Chiu and W. Chow *G321-5083*

VM/370—a study of multiplicity and usefulness
L. H. Seawright and R. A. MacKinnon *G321-5084*

The changing virtual machine environment: Interfaces to real hardware, virtual hardware, and other virtual machines
R. A. MacKinnon *G321-5085*

VM/370 asymmetric multiprocessing
L. H. Holley, R. P. Parmelee, C. A. Salisbury, and D. N. Saul *G321-5086*

A formal approach for communication between logically isolated virtual machines
R. M. Jensen *G321-5087*

Virtual Control Storage—security measures in VM/370
C. R. Attanasio *G321-5088*

Evolution of a virtual machine subsystem
E. C. Hendricks and T. C. Hartmann *G321-5089*

Managing VM/CMS systems for user effectiveness
W. J. Doherty and R. P. Kelisky *G321-5090*

State sampling of interactive VM/370 users
W. H. Tetzlaff *G321-5091*

Computing and communications—A perspective of the evolving environment
L. M. Branscomb *G321-5092*

An introduction to network architectures and protocols
P. E. Green *G321-5093*

Public data networks: Their evolution, interfaces, and status
J. R. Halsey, L. E. Hardy, and L. F. Powning *G321-5094*

SNA and emerging international standards
F. P. Corr and D. H. Neal *G321-5095*

SNA multiple-system networking
J. P. Gray and T. B. McNeill *G321-5096*

Routing and flow control in Systems Network Architecture
V. Ahuja *G321-5097*

Evolution of a laboratory communication network
R. S. Moore *G321-5098*

Potential technology implications for computers and telecommunications in the 1980s
W. D. Frazer *G321-5099*

Performance analysis of complex communications systems
H. M. Stewart *G321-5100*

A distributed information system study
K. Ziegler, Jr. *G321-5101*

An office communications system
G. H. Engel, J. Groppuso, R. A. Lowenstein, and W. G. Traub *G321-5102*

A research perspective on computer-assisted office work
A. M. Gruhn and A. C. Hohl *G321-5103*

Automatic programming for energy management using sensor based computers
M. J. Shah *G321-5104*

An integrated approach to centralized communications network management
R. A. Weingarten *G321-5106*

An operating system for distributed processing—DPPX
S. C. Kiely *G321-5107*

I/O facilities of the Distributed Processing Programming Executive (DPPX)
H. R. Albrecht and L. C. Thomason *G321-5108*

Data Management for the Distributed Processing Programming Executive (DPPX)
A. K. Fitzgerald and B. F. Goodrich *G321-5109*

Design of the IBM 8100 Data Base and Transaction Management System — DTMS
F. C. H. Waters *G321-5110*

Distributed processing: An assessment
H. Lorin *G321-5111*

Overview of the capacity planning process for production data processing
L. Bronner *G321-5113*

A capacity planning methodology
J. C. Cooper *G321-5114*

System capacity and performance evaluation
D. C. Schiller *G321-5115*

Modeling considerations for predicting performance of CICS/VS systems
P. H. Seaman *G321-5116*

The role of detailed simulation in capacity planning
H. C. Nguyen, A. Ockene, R. Revell, and W. J. Skwish *G321-5117*

An MVS tuning approach
R. M. Schardt *G321-5118*

A sidestream approach using a small processor as a tool for managing communication systems
J. R. Leach and R. D. Campenni *G321-5119*

Systems management
R. A. Bird and C. A. Hofmann *G321-5120*

Logical distribution of applications and data
C. T. Baker *G321-5121*

Distributed processing communications software support for operation within an SNA network
E. S. Harrison *G321-5122*

System contention analysis — An alternate approach to system tuning
A. Yuval *G321-5123*

Data base security: requirements, policies, and models
C. Wood, E. B. Fernandez, and R. C. Summers *G321-5124*

The IPS cryptographic programs
A. G. Konheim, M. H. Mack, R. K. McNeill, B. Tuckerman, and G. Waldbaum *G321-5125*

Interactive graphics today
R. S. Burchi *G321-5126*

Software architecture for graphical interaction
D. L. Weller, E. D. Carlson, G. M. Giddings, F. P. Palermo, R. Williams, and S. N. Zilles *G321-5127*

Architecture of the IBM 3277 Graphics Attachment
D. F. McManigal and D. A. Stevenson *G321-5128*

Experimental page makeup of text with graphics on a raster printer
B. J. Shepherd *G321-5129*

A high-resolution computer graphics system
S. W. Handelman *G321-5130*

An APL approach to presentation graphics
W. H. Niehoff and A. L. Jones *G321-5131*

A graphic interactive application monitor
J. H. Bleher, P. G. Caspers, H. H. Henn, and K. Maerker *G321-5132*

The management of software engineering

Part I: Principles of software engineering
H. D. Mills

Part II: Software engineering program
D. O'Neill

Part III: Software design practices
R. C. Linger

Part IV: Software development practices
M. Dyer

Part V: Software engineering management practices
R. E. Quinnan *G321-5133*

Application development system: The software architecture of the IBM Health Care Support/DL/I-Patient Care System
D. J. Mishelevich and D. Van Slyke *G321-5134*

A system for constructing linear programming models
S. Katz, L. J. Risman, and M. Rodeh *G321-5135*

The Modular Application Customizing System
R. D. Gordon *G321-5136*

GREENPRINT: A graphic representation of structured programs
L. A. Belady, C. J. Evangelisti, and L. R. Power *G321-5137*

Electronic information interchange in an office environment
M. R. DeSousa *G321-5138*

A primer on relational data base concepts
G. Sandberg *G321-5139*

System R: An architectural overview
M. W. Blasgen, M. M. Astrahan, D. D. Chamberlin, N. J. Gray, W. F. King, B. G. Lindsay, R. A. Lorie, J. W. Mehl, T. G. Price, G. R. Putzolu, M. Schkolnick, P. G. Selinger, D. R. Slutz, H. R. Strong, I. L. Traiger, B. W. Wade, and R. A. Yost *G321-5140*

Processor, I/O path, and DASD configuration capacity
J. B. Major *G321-5141*

User-definable software applied to a real-time ambient air quality monitoring system
P. Halpern and J. W. Rettberg *G321-5142*

Procedures of the Human Factors Center at San Jose
R. S. Hirsch *G321-5144*

Effects of manual style on performance in education and machine maintenance
J. M. Judisch, B. A. Rupp, and R. A. Dassinger *G321-5145*

Natural language programming: Styles, strategies, and contrasts
L. A. Miller *G321-5146*

Human factors in the development of a family of plant data communication terminals
M. Ominsky *G321-5147*

Human factors in communication
J. C. Thomas and J. M. Carroll *G321-5148*

Software simulation as a tool for usable product design
I. A. Clark *G321-5149*

Improving system usability for business professionals
G. A. Helander *G321-5150*

Improving the usability of programming publications
F. J. Bethke, W. M. Dean, P. H. Kaiser, E. Ort, and F. H. Pessin *G321-5151*

A system for the automated office environment
P. C. Gardner, Jr. *G321-5152*

Capacity analysis of the Mass Storage System
P. N. Misra *G321-5153*

A perspective on software science
